
Location: San Diego, California, USA (venue to be determined)
Date: September 10th, 2013
Cost: $285.00 (CAD) early registration, $500.00 (CAD) late registration, Lunch Provided

Why you need to attend:

Aptamer technology has finally arrived. The true advantage of aptamers over antibodies is realized in commercial applications.

- Commercial production of aptamers can be performed in a week.
- Diagnostic applications can be developed immediately after ligand identification.
  - No cell lines
  - No need for optimizing recombinant expression

NeoVentures Biotechnology has experience commercializing aptamer based diagnostics. In this workshop, they will provide a full overview of technical and business considerations involving the development of aptamer based products.

Special guest speaker for San Diego Workshop:

TriLink BioTechnologies Inc. Global leaders in the development of truly random aptamer selection libraries.

Agenda:

1st session: “Aptamer identification”

Theory and practice of aptamer selection processes, including an overview of recent advances including NeoVentures Dubbles platform, and TriLink presentation on random library analysis. NeoVentures will also provide a description of the application of next generation sequencing to consensus motif discovery during the library evolution process.

2nd session: “Aptamer development”

Practical examples of aptamers in commercial applications with a focus on diagnostics.

3rd session: “The business of aptamers”

4th session: “Custom aptamer development”

Description of services provided by NeoVentures Biotechnology Inc.
NeoVentures Biotechnology Inc.

NeoVentures has been the first company globally to commercialize an aptamer based diagnostic. The company has established a global leadership position over the identification and commercialization of aptamers by developing proprietary platforms for aptamer identification, selected sequence analysis, and aptamer based diagnostic applications. NeoVentures is the only company with the capacity to support your aptamer development efforts from identification through product development and commercial production.

Registration:

Fee: $285.00 (CAD) early registration, $500.00 (CAD) late registration. The registration fee includes documentation and handouts, continental breakfast, lunch and break refreshments. Enrollment is limited and on a first come first serve basis. Please register by filling out the form and returning it to NeoVentures.

Registration will not be final until payment is received. Refunds will not be granted but you may send an alternate.

Registration Form: Aptamer Workshop
